

## 2. Mníšek

- 2C – cutting twice per year with biomass removal
- U – unmanaged treatment
- 1MM – mulching once per year in May
- 1MČ - mulching once per year in July
- 1MZ- mulching once per year in September
- 2M - mulching twice per year
- 3M - mulching thrice per year
- Combined managed treatments
- 2M x 1C (1. year 2x mulching, 2. year 1x cutting with biomass removal)
- U x 1C (1. year unmanagement, 2. year 1x cutting with biomass removal)
- U x 2M (1. year unmanagement, 2. year 2 x mulching)
- Experiment was established in 1997
- On *Arrhenatherion* meadow
- Overall 4 randomized blocks (40 plots)
- Each plot has rectangle shape 10 x 3,7 m (vegetation is observed on 8 x 2,5 m)
- Mulching and cutting height is 5 cm over the soil surface

# Plan of the experiment

[illegible]
